Back-End Developer

Sergii Kostanets

One can do it, others can. If no one could, be the first!

I am a former teacher and I love to study and take a responsible approach to solving the assigned tasks. Thanks to years of teaching I will find a common language with anyone. Teamwork is the best kind of collaboration for me. I devote my free time to studying technologies necessary for back-end and front-end and I aspire to create useful and effective products, see the result of my work and evolve in this direction.

Certificates

1. HTML5 .... **[** SOLOLEARN, GoIT **]**
